GO_Biological_Process_2021
regulation of homophilic cell adhesion (GO:1903385)
positive regulation of blood vessel endothelial cell proliferation involved in sprouting angiogenesis (GO:1903589)
coronary vasculature development (GO:0060976)
apoptotic chromosome condensation (GO:0030263)
positive regulation of trophoblast cell migration (GO:1901165)
positive regulation of blood circulation (GO:1903524)
positive regulation of icosanoid secretion (GO:0032305)
cell migration involved in gastrulation (GO:0042074)
heparan sulfate proteoglycan biosynthetic process, polysaccharide chain biosynthetic process (GO:0015014)
forebrain neuron differentiation (GO:0021879)
